Art Unit: 1772

1. Applicant's election without traverse of group I (claims 1-29) in Paper No. 8 is acknowledged.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

3. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
4. Claims 1-6, 8-13, 16-17, 19-20, 22-26 and 28-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato (4,061,808).

Sato relates to a label sheet construction comprising a liner sheet (27), a facestock sheet (25) adhered to the liner sheet. As shown in figure - 8, the facestock sheet has at least one cut line (30) cut therethrough but not the liner sheet. The construction includes a first and second line segment in the facestock sheet and extending from edge to edge. The facestock sheet is bendable along said line (figure - 12).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato.

Art Unit: 1772

Sato, as discussed above, fails to teach that the label has a burst configuration with alternating long and short points. It would have been an obvious matter of design choice to provide Sato's label with a burst configuration because such a change would have involved a mere change in shape for aesthetic appeal.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 703-308-4424. The examiner can normally be reached on Monday-Thursday from 7:30 am to 5 pm. The examiner can also be reached on alternate Friday.
